Profile

I build and maintain Drupal sites for universities and government, and connect them to React and Vue frontends through REST, JSON:API and GraphQL. Most of my work is upgrading legacy Drupal projects, making them faster, and adding the features each user role needs. Before I write code, I talk with the people who use the system, so the result fits how they work.

- 5+ years building and upgrading Drupal sites
- e-UADER: 2,000+ registered users, 1,100+ certificates issued
- 57,000+ active users and 786,000+ events on UADER portals
- Moved a monolithic Drupal site to a headless React frontend

Experience

Drupal Consultant · CyS Informática

03/2026 · 04/2026

Remote · Contract

- Maintained and upgraded corporate Drupal platforms across dev, staging and production.
- Adapted content during a Drupal 8 to 10 migration and fixed sync conflicts between both versions.
- Took over high-priority incidents escalated from the original team and kept the platform online.
- Set up role-based access (RBAC) and publishing rules in Drupal 10, consistent across all environments.
- Built JSON:API integrations and publishing workflows that keep unpublished content private.
- Fixed configuration drift and dependency conflicts by standardizing Composer, DDEV and Drush setups.
- Audited and refactored custom and contrib modules to reduce technical debt.

Full-Stack Developer (Drupal + React) · Activarte

2023 · 2026

Remote

- Moved a monolithic Drupal site to a headless setup: Drupal serves content over REST with OAuth2, React renders the frontend.
- Upgraded the site for speed and performance, and added features for each user role.
- Wrote the REST endpoints and OAuth2 flows between Drupal and the React frontend.
- Built custom React components that consume JSON:API payloads.
- Worked in Agile sprints in Jira, with code reviews on Bitbucket.
- Mentored teammates on code quality and reviews.

Drupal / Moodle Developer · UADER Rectorado

2021 · Present

Part-time · On-site

- Lead the university's web projects on Drupal and Moodle, and act as the main link between academic, administrative and government stakeholders.
- Built and maintain three university portals with 57,000+ active users and 786,000+ events.
- Built e-UADER, a course enrollment platform on Moodle's REST API: 2,000+ registered users and 1,100+ certificates issued.
- Added ECA automations and custom Drupal modules that simplify each area's interfaces and workflows, so staff finish common tasks faster.
- Upgraded the sites for speed and performance, and fixed recurring server bottlenecks.
- Migrating a legacy Drupal monolith to a headless frontend with React and GraphQL.
- Building a new internal university app from scratch with Vue.js.
- Train the team on Drupal practices and project lifecycle.
- Building a multi-agent AI orchestrator that gives LLMs separate roles for code generation, review and deployment.

Selected projects

- e-UADER · UADER e-learning platform

e.uader.edu.ar

Connected Drupal Commerce to Moodle through its REST API, with a 5-step self-enrollment flow and automatic digital certificates. 2,000+ registered users and 1,100+ certificates issued so far, with no manual step to issue them.

Drupal · Moodle · REST APIs · Commerce
- Ingresantes UADER · Portal for prospective students

ingresantes.uader.edu.ar

Built a career finder in Drupal with pre-enrollment workflows, orientation tools and downloadable program guides. Applicants explore careers and start pre-enrollment in one guided place.

Drupal · Paragraphs · Views
- Buenos Aires City · City government portal

buenosaires.gob.ar/inicio

Adapted content and Paragraphs for the Drupal 8 to 10 migration, fixed sync conflicts between both versions, and handled escalated incidents. Content moved to Drupal 10 with a cleaner model for editors.

Drupal 8 → 10 · Paragraphs
- Club San Jorge · Legacy modernization

clubsanjorge.com.ar

Refactored the project with modern patterns, a clearer structure and maintainable practices. Code the client can extend and maintain more easily.

PHP · Legacy → Modern

Skills

Languages & Frameworks	PHP, JavaScript (ES6+), React.js, Vue.js, Symfony, Java, SQL, HTML5, CSS3, Sass, Bootstrap, jQuery
Drupal & CMS	Drupal 8/9/10/11, Custom Modules, Hooks, Entity API, Theming, Configuration Management, Search API, Commerce, ECA, Moodle
APIs & Performance	REST APIs, JSON:API, GraphQL, OAuth2, Web Performance, Xdebug, Chrome DevTools
Testing & Tools	PHPUnit, Composer, DDEV, Drush, Git, GitHub, GitLab, Bitbucket, CI/CD, Pantheon, Docker, Kubernetes, AWS, SSH, MySQL, PostgreSQL
Security & Process	OWASP, Secure Authentication, Scrum, Kanban, Jira
AI Tooling	Multi-agent orchestration, Cursor, Ollama / local LLMs, Prompt engineering

Education

- Associate Degree: Information Systems
- Autonomous University of Entre Ríos · Graduated 2025
- High School Diploma: Economics
- Centenario High School · 2011 · 2015

Languages

Spanish: Native · English: Fluent · Professional working proficiency

Courses and certifications

Diploma in DevOps Engineering · Mundos E	Apr 2025
React.js · Coder House	Jun 2023
JavaScript · Coder House	Jun 2023
Web Development · Coder House	Mar 2023
Git Version Control · Gugler	Jan 2023
Java Programming, Level 1 · Gugler	Jul 2020
English, Advanced · Advance	Dec 2014
